National	708840	592.9	381920	319.5	342960	286.9	399510	334.2

Notes

1. Figures have been calculated using data collected by the Department for Education (DfE) in the Children in Need (CIN) census. A child in need is one who has been referred to children's social care services, and who has been assessed to be in need of social care services. A child can have more than one episode of need throughout the year but episodes should not overlap.

2. These statistics include episodes where the child is awaiting assessment at 31 March and those that do not require an assessment; this may include cases where the child has transferred in to the local authority and an assessment has already been completed, family court related work, adoption support, short breaks, cancelled episodes and other reasons. The statistics are included to give an understanding of the overall CIN population and are not intended to be used as a measure of local authority performance.

Rounding and Suppression:

England and regional totals are rounded to the nearest 10 therefore sub totals may not sum to totals. Rates are rounded to one decimal place.

Any number between 1 and 5 inclusive has been suppressed and replaced by c.

Notes

1. The Disability Discrimination Act defines a disabled person as a person with a "physical or mental impairment which has a substantial and long term adverse effect on his ability to carry out normal day to day activities". The condition must have lasted or be likely to last at least 12 months in order to be classed as a disability.

2. A child may have more than one disability recorded. Therefore, the percentage of children in need at 31 March with a disability recorded broken down by disability won't always sum to 100.

3. The total figures for England and regional totals are rounded to the nearest 10. Sub totals may not add up to the England total and regional totals due to rounding.

England and regional totals are rounded to the nearest 10 therefore sub totals may not sum to totals. Percentages are rounded to one decimal place.

Any number between 1 and 5 inclusive or a percentage based on a numerator between 1 and 5 inclusive has been suppressed and replaced by c.

Notes

1. The calculation for duration is based on the difference between 31 March 2019 and the referral date.
2. Open cases refer to children whose cases are open at 31 March 2019 (i.e. the child is still in need at 31 March).
3. The total figures for England and regional totals are rounded to the nearest 10. Sub totals may not add up to the England total and regional totals due to rounding.
4. c = Any number between 1 and 5 inclusive. These have been suppressed and replaced by c. Secondary suppression has been carried out where necessary to preserve confidentiality.

Notes

- When a child is referred to children's social care with a request for services to be provided the main reason why the child started to receive services is recorded as their primary need.
- Includes a small number of children with unknown primary need which are not shown in the separate breakdowns.
- The total figures for England and regional totals are rounded to the nearest 10. Sub totals may not add up to the England total and regional totals due to rounding.
- c = Any number between 1 and 5 inclusive. These have been suppressed and replaced by c. Secondary suppression has been carried out where necessary to preserve confidentiality.

Notes

1. Duration of episode of need calculated using the difference between the referral date and the CIN closure date.
 2. Includes a small number of children whose CIN closure date was before their referral date which are not included in the separate breakdowns.
 3. The total figures for England and regional totals are rounded to the nearest 10. Sub totals may not add up to the England total and regional totals due to rounding.
- Any number between 1 and 5 inclusive, or a percentage based on these figures has been suppressed and replaced by c
